Vumane Kamanga

Profile

Enthusiastic and motivated Application Development student with a passion for building practical and user-focused software solutions. Experienced in developing both desktop and mobile applications, I enjoy transforming ideas into functional, efficient, and well-structured systems. I am eager to apply my technical skills, problem-solving abilities, and creativity in a professional environment while continuing to grow as a developer.

Technical Skills

JAVA
KOTLIN
SQL
HTML & CSS
JavaScript (Basic)

Work Experience

Informal IT Support (Part-Time / Volunteer)
Present
Assisted students and community members with computer troubleshooting.
Installed operating systems and software.
Provided basic networking and printer setup support.

PROJECTS

Student Accommodation Management System (JAVA Swing)

Second Year

> Developed a desktop application for managing student accommodation. Implemented CRUD operations with database connectivity. Designed user-friendly GUI interfaces. Applied MVC design principles

Android Login & Registration App (Kotlin + ROOM)

> Developed a mobile app with login, registration, and display functionality. implemented ROOM database for local data storage. Applied navigation between multiple activities. Ensured data validation and user authentication.
